

80.GUARDO, VEDO, OSSERVO, DISTINGUO E CONTO FINO A 40 CON L'USO DEL VELCRO

Strumento per imparare e riconoscere i numeri fino a 40 e saper discriminare i diversi animali rispondendo con la coppia di numeri appropriati per ogni tipo di animali presenti dentro il recinto.

Stampa, ritaglia, lamina, applica il velcro ove necessita, utilizza e riutilizza

Ogni tessera ha una dimensione diversa per una maggiore praticità di lavoro.

N. 8 segnaposti misure in millimetri: 43X41

N. 16 tessere degli animali: 24X24 mm da utilizzare per il conteggio dentro il riguardo/recinto per essere osservati e contati.

N. 40 numeri: 35X35 (Ho scelto di utilizzare un unico colore per le unità e le decine, cosa che in passato non ho fatto, perché credo che in realtà la convenzione "colore-valore" non è necessaria neanche con bambini più deboli e che può costituire un ostacolo didattico per la costruzione del valore posizionale delle cifre nella scrittura dei numeri. Ho scelto il Nero semplicemente per poter stampare la pagina intera con una stampante monocromatica ma, avrei potuto scegliere qualsiasi altro colore.

N. 2 X: 28X28

Alla pag. n. 2 trovi il tabellone da stampare e laminare per apporre il velcro (lato morbido) nei riquadri dove è scritto.

Alle pagg. n. 3 e 4 Trovi le tessere segnaposto degli animali da laminare e apporre il velcro (lato ruvido). * le tessere più piccoli di venti animali per specie che, personalmente, le ho laminate e le utilizzo senza velcro mettendole dentro il recinto (vedi Anteprema). In alternativa si potrebbero utilizzare col velcro e tappezzare per intero l'interno del recinto con velcro lato morbido (per questo consiglio di ritagliare semplice velcro recuperato da un bagagliaio di un'auto)

80.Guardo, Vedo, Osservo, Distinguo e Conto con l'uso del velcro
